PUBLIC STATEMENT OF SHERYL BRYANT

EIS000601

DEC 02 1999

MR. BRYANT: My name is Sheryl Bryant. And I'm looking at the map that was handed out in the presentation tonight.

1 I see a continental divide and I see a numbers divide. I count seven nuclear generation stations on the West and 70 on the East, and it looks like we're being commandeered.

2 Another point that the gentleman from National Citizen Action Alert brought up was any town that will be seeing transportation pass through needs to have a hearing. It cannot just be blessed upon them. They need to know the concerns and the hazards that will be passing through their communities.

3 My last comment is if the repository is placed in Nevada, we need to charge a million dollars a pound.
